

INNOVATION IN FOCUS: AEROCOMPACT PRESENTS THE LATEST MOUNTING SOLUTIONS AT THE OCTOBER LIVE LAUNCH

Satteins, October 2025 – With a 45-minute digital Live Launch, AEROCOMPACT once again demonstrated its innovative strength. The international audience followed with great interest the presentation of two new products designed to make the installation of photovoltaic systems even more efficient, safe, and cost-effective in the future.

Parts of the event were broadcast live from the AEROCOMPACT Studio in Satteins, combining hands-on product demonstrations with detailed animations and expert interviews. Numerous viewers from across Europe took the opportunity to ask questions via live chat and engage directly with the product experts.

COMPACTFLAT SN FAST

Building on the proven COMPACTFLAT SN 2 system, SN FAST introduces a new click-in concept for particularly quick, tool-free installation. Thanks to pre-assembled components, only three rail types, and Euro-pallet logistics, setup, handling, and storage are significantly simplified.

The system offers flexible application options (short- or long-side clamping, various row distances) and is fully compatible with the existing accessories of the SN series. The result: reduced installation time and lower complexity – with consistently high stability and safety.

Exclusive Preview: COMPACTPITCH XT-R 2.0

As an additional product innovation, AEROCOMPACT provided an exclusive first look at the further development of its successful pitched roof system. The new XT-R 2.0 will offer even greater load capacity, flexibility, and installation convenience – with more details to follow next year.

The event recording provides a compact overview of all technical highlights, application advantages, and new additions to the product portfolio.

“With this October launch, we’re showcasing how our solutions are designed to make the installation process as simple and efficient as possible – without compromising on quality or safety. The high level of interest and positive feedback from our customers confirm that we’re on the right track with this strategy,” says Franziska Nitschmann, Head of Global Marketing at AEROCOMPACT.

In 2026, AEROCOMPACT will continue to focus on practical, efficient system solutions – with the goal of continuously optimizing the planning, installation, and application of PV systems while promoting sustainable standards across the industry.

About AEROCOMPACT

AEROCOMPACT is an innovative supplier of solar mounting solutions offering a unique combination of engineering expertise, the AEROTOOL® digital platform and global market access. The company's core competence is the development, production and distribution of aerodynamically optimized substructures for mounting photovoltaic modules, taking into account all static requirements, wind and snow loads as well as the highest industry standards and norms. Thanks to the AEROTOOL® and AEROTOOL.CAD

AEROCOMPACT®

Pressemitteilung

digital platforms, planners and end customers worldwide can quickly and easily plan solar systems, calculate their cost-effectiveness and order the AEROCOMPACT products required for the substructure in an automated process. AEROCOMPACT was founded in 2014 by Mathias Muther in Schlins, Vorarlberg, Austria. AEROCOMPACT currently employs ca. 150 people worldwide and has subsidiaries in Austria, Germany, the US, India and Bulgaria. As well as its own global sales presence AEROCOMPACT serve various customer groups such as installers, wholesalers and project developers with system solutions for the Residential, Commercial and Industrial as well as Utility sectors.
